

PSCB Pro Student Pages Installation Guide

Plugin Description

PSCB DEV Pro Student Pages is a collection of 12 of the most frequently accessed student pages in PowerSchool that have been enhanced with additional features and functionality like those included in other PSCB Customizations and Reports.

Once the Pro Student Pages plugin is installed, the available page links will appear in the student left navigation menu under the category **PSCB Pro Student Pages**.

The **PSCB Pro Student Pages Settings** page allows administrators to manage which pages are available at each individual school, providing the ability to customize the student navigation experience by location.

When accessing PSCB Pro Student Pages from the **District Office** level, only 7 of the available pages will display by default. The District Office display is controlled by the plugin and cannot be disabled through the settings page.

Pro Student Pages - Before You Install Requirements

Step 1

Disable or delete the following PSCB DEV Custom Student plugins.

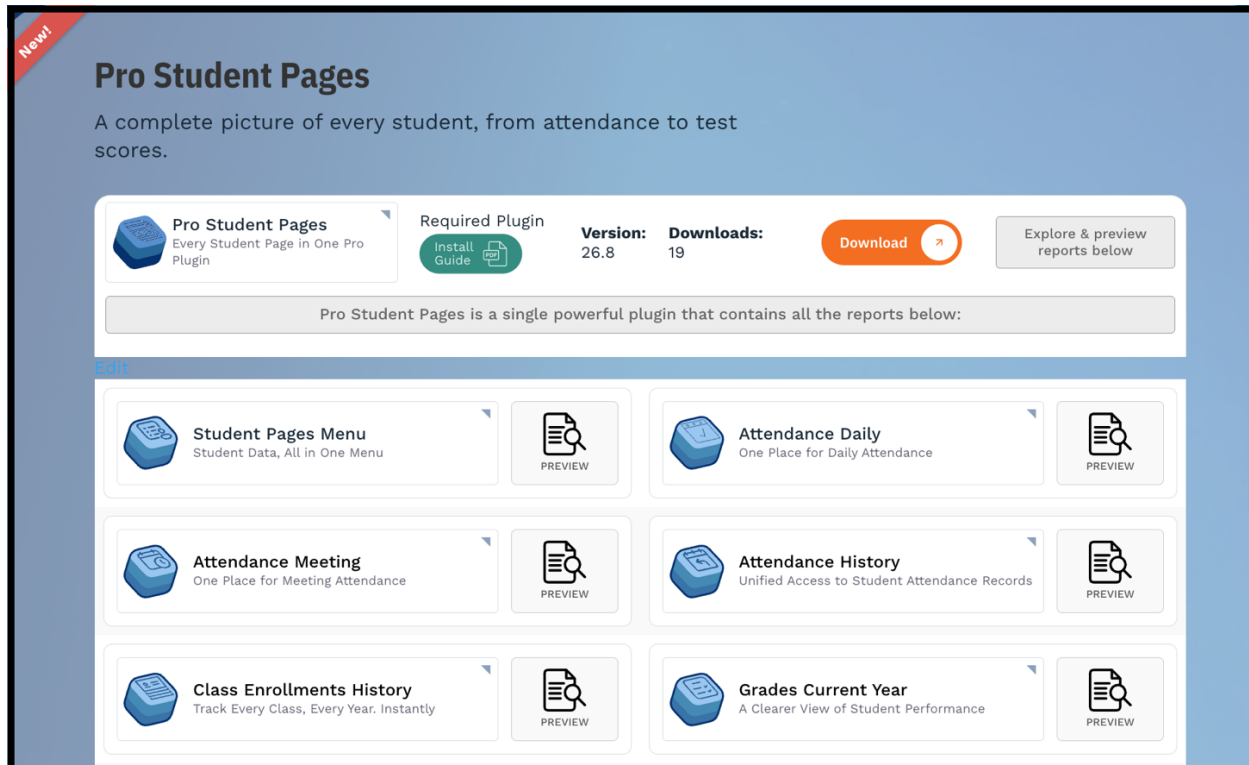

- PSCB DEV Custom - Std_Screens Menu
- PSCB DEV Custom - Std Att History
- PSCB DEV Custom - Std Class Enrollment

- PSCB DEV Custom - Std Requests FY
- PSCB DEV Custom - Std Schedule Views
- PSCB DEV Custom - Std Test Scores

Step 2

Install/Update the PSCB DEV Pro Reports - Base Module DA v26.8 plugin.

Installing the PSCB DEV Pro Custom Student Pages Plugin

1. Use your browser to navigate to the [PSCB DEV Development](#) web site.
2. Login to the website.
3. Click the **Pro Subscription Plugins** link on the Home Page.
4. Download the **Student Pages** plugin by selecting the orange download button.

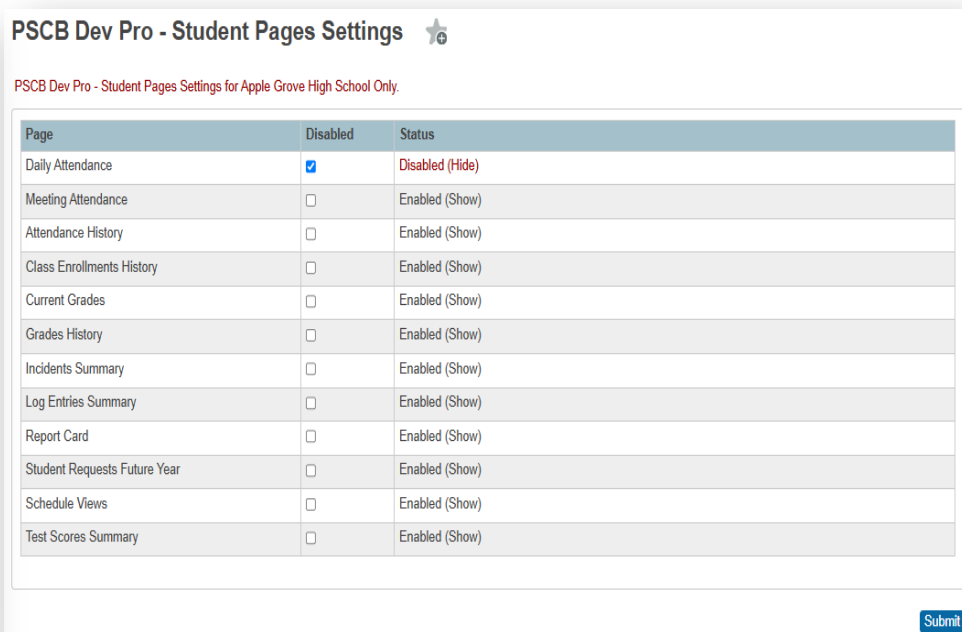

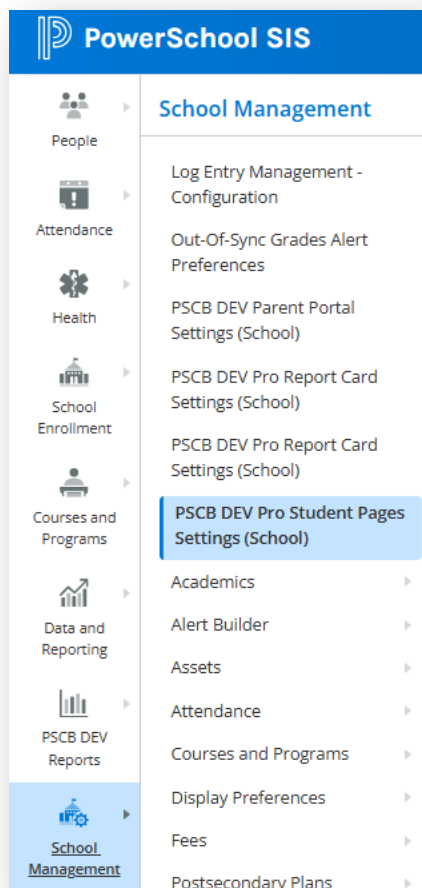

Install Plugin

1. Log into your PowerSchool server.
2. Navigate to System Management >Server >Plugin Configuration.
3. The Plugin Management Dashboard will appear.
4. Click Install. The Plugin Install page will appear.
5. Click Choose File and navigate to the location where you downloaded the **PSCB Pro Student Pages** plugin.
6. Select the file and Click Install.
7. A confirmation message, "**The plugin was installed successfully**", will appear.
8. Click the empty checkbox next to plugin name: **PSCB Pro Student Pages**.
9. The Enable Plugin Screen will appear.
10. Click the Enable button located at the bottom of the screen to activate the plugin.
11. A confirmation message, "**The Plugin was successfully enabled,**" will appear.

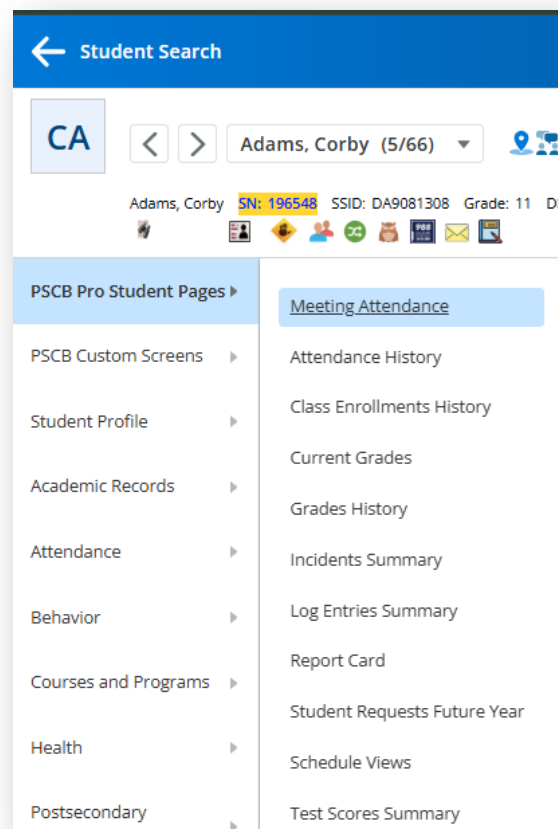

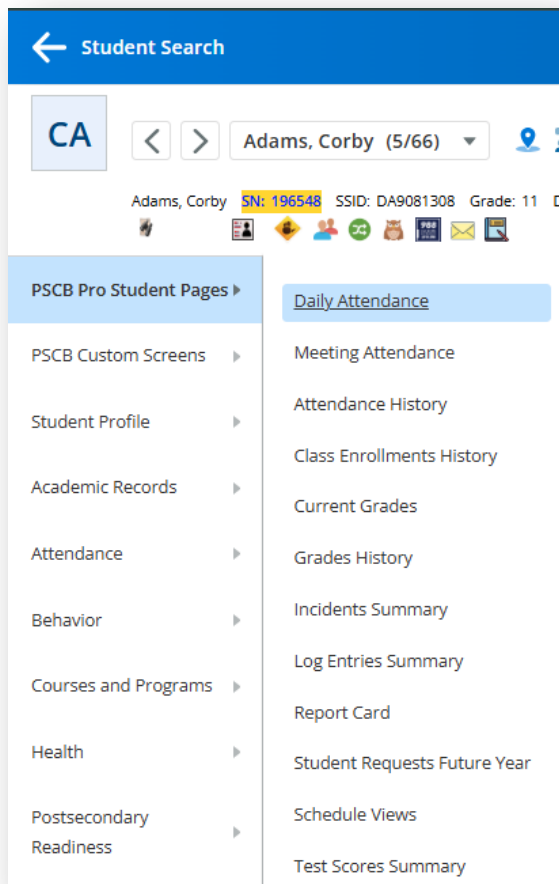

Enable/Disable Student Screens

1. From the school, navigate to **School Management > PSCB DEV Pro Student Pages Settings (School)**.
2. All 12 pages are enabled by default. Select the checkbox by each page you **do not** want to display.
3. Select Submit to save the changes for the current school.
4. Repeat the process at each school on your server.

School - PSCB Pro Student Pages - EUI Menu

1. Navigate to a School.
2. To access the student menu, select a student.
3. Click **PSCB Pro Student Pages** on the left menu to access the available screens for the student at the current school.
4. Note, only the pages that are enabled for the current school will display on the menu.

District Office - PSCB Pro Student Pages - EUI Menu

1. Navigate to District Office.
2. To access the student menu, select a student.
3. Click **PSCB Pro Student Pages** on the left menu to access the available screens for the student at District Office.
4. Note, the following seven student screens will display when viewing the Pro Student Pages from the District Office.
